Sea Grants to Fund Long Island Research Projects

By Staff on April 23rd, 2012

Five Stony Brook University-based research projects ranging from studying storm surges to mercury concentrations in fish are receiving a large chunk of federal funding from [New York Sea Grant](#), according to an article on [NorthShoreofLongIsland.com](#).

Together, the Stony Brook projects are receiving about \$560,000 through the end of 2012, and will get roughly the same amount next year, according to Barbara Branca, New York Sea Grant communications manager. The amount is a share of \$2.4 million in funding New York Sea Grant awarded to projects throughout the region.
